## GRADUATION SURVEY REPORT 2020-2021

This report focuses on results from students graduating during academic year 2020-2021 (summer semester 2020 through spring semester 2021). The Graduation Survey is a self-report instrument for graduating students to update their forwarding contact information before they leave Oklahoma State University Institute of Technology (OSUIT; see Appendix J for a copy of the survey); it includes items about graduates' immediate plans, including placement, as well as current and anticipated job-seeking outcomes. Once graduating students complete the contact and placement information, the survey continues with scales for rating satisfaction with academic and non-academic services and giving graduates the opportunity to provide feedback on their educational experiences. Administrators of each academic school receive contact information and placement data, while satisfaction scale ratings remain in the Office of Institutional Research for analysis, aggregation, and inclusion in the current report.

The administrative assistants, program support strategists, and faculty advisors in each academic school remind graduating students to complete the Graduation Survey prior to graduation, but no earlier than necessary; the OSUIT Office of Institutional Research prefers administration during the last two weeks of classes. Because of OSUIT's graduation schedule, administration of the Graduation Survey occurs continuously throughout the year as students prepare to graduate.

Six-hundred-forty-eight (648) students earned 683 degrees (see tables 1 and 2) between summer 2020 and spring 2021; of these, 613 students graduated with one degree and 35 graduated with two degrees. Two hundred ninety (290) surveys were filled out for a 42.46 percent response rate; this is below the targeted knowledge rate of 65 percent as recommended by the National Association of Colleges and Employers (NACE, 2019). As participation rates in the Graduation Survey at OSUIT continue to decline, strategies for improving participation rates receive renewed consideration. When graduates fail to report their employment data, employment rates as reported in the annual OSUIT *Employment Report* and to Oklahoma Workforce decline. Further, funding sources for education and continued internship and employment opportunities may likewise decline resulting in a downward spiraling trend.

**Table 1: Degrees conferred by academic school.**

School	Summer 2020	Fall 2020	Spring 2021	Degrees Conferred	Surveys Completed	Completed Percent
Arts, Sciences & Health	48	90	106	244	75	30.74%
Creative & Information Technologies	42	49	37	128	79	61.72%
Engineering & Construction Technologies	124	36	68	228	126	55.26%
Transportation & Heavy Equipment	71	0	12	83	12	14.46%
Total	285	175	223	683	292*	42.75%

\*Note: Two graduates completed degrees in two schools adding two to the number of total surveys. As a primary school was not determined, results are duplicated for each school from which the student graduated. For clarity, one student graduated from the School of Creative & Information Technologies, and another from the School of Engineering & Construction Technologies; both also graduated from the School of Arts, Sciences, & Health.

Table 2: Degrees conferred by degree type.

### Placement and salary data

Of the 290 graduating students who filled out the Graduation Survey, all provided placement data (see Appendix A for placement data by academic school); 73.45 percent either had a job lined up, were continuing their education, or a combination of these. On the other hand, 21.72 percent were seeking employment, while an additional 4.83 percent were **not** seeking employment (Figure 1). When asked to explain why they were not seeking employment, nine respondents replied that they were on internship, already employed, or had accepted a job.

Figure 1: Placement

Placement	Count	Percent
I have accepted a job in my field of study	129	44.48%
I have accepted a job in an unrelated field	7	2.41%
I am self-employed in my field of study	1	0.34%

I am currently seeking employment	63	21.72%
I am not seeking employment at this time (please explain):*	14	4.83%
Grand Total	290	100.00%

When placement data reported by our graduating students was disaggregated by highest degree earned (see Figure 2), BT degree earners had the highest rate of employment as well as the highest rate of seeking employment. Students graduating with an AS degree, as expected, often continued their education at another institution. Please note that the Graduation Survey is typically completed in the student's last semester at OSUIT when they may not yet have a firm job offer.

Note: Out of the 290 respondents, 272 completed graduation requirements during the 2020-2021 academic year.

Employers such as AEP/PSO, OG&E, and Oncor Electric & Delivery were listed as part of the employment information collected on the Graduation Survey. Salary data for graduates reporting starting pay is listed in Figure 3 (see Appendix B for salary ranges). Although reported pay ranges indicate that some graduates were likely responding as part-time employees, starting pay for most graduating students was respectable with the median pay range for 2020-2021 respondents between \$40,000 and \$44,999.

Percentages represent the ratio of responses to the number of respondents reporting salary data.

\*Note: Below federal minimum wage for full-time yearly pay.

In the process of completing the Graduation Survey, students who report placement in one of the *employment* categories sometimes leave the employment details blank. In the past, respondents have cited employment requirements-- such as signing a non-disclosure agreement-- as the reason. However, direction by the US Department of Labor, The US Department of Education, the North Central Association of the Higher Learning Commission, and the Oklahoma State Regents for Higher Education requires higher education institutions to report aggregated employment data, including salaries, for purposes of transparency and accountability. The Graduation Survey is the most direct method currently at our disposal.

In an attempt to meet federal and state requirements, the Graduation Survey data includes a confidentiality statement to the effect that all survey data, including employment data, is kept confidential. Student are encouraged to complete the employment section of the survey. Student names are not listed with their employers, nor are salaries listed by employer. Salaries, as noted in Figure 3, are reported in ranges for an additional layer of privacy.

### Survey Scales

Five scales (see tables 3-8 in the next section) were used to determine levels of satisfaction among graduating students in areas of *Academics, Campus Services, Student Services, General Feedback, and Summary Items*; all were administered with a five-point scale ranging from 1 = *Very Dissatisfied* to 5 = *Very Satisfied* or 1 = *Strongly Disagree* to 5 = *Strongly Agree*. The summary items included in this survey are similar to those used in many instruments measuring satisfaction.

Also included was a scale on *Student Life Activities* to examine student engagement in sponsored extracurricular activities. Unlike the other scales, which report average scaled responses, the *Student Life Engagement* scale was characterized by a frequency distribution summarizing the accumulation of endorsements representing participation in the activities listed.

In the current report, tables show the results for graduates of the most recent academic year with frequencies for each item response choice and including frequencies of *Not applicable* and *Did not answer* when appropriate. The results tables comparing the most recent five years (tables 9-14, next section) show the average responses on each item for those five academic years. The averages account for only the students who responded to an item; nonresponses and “not applicable” responses carry no weight and were excluded from the averages.

**Satisfaction with Academic Program.** Graduates reported varying levels of satisfaction related to academic programs over the previous year (see tables 3 and 9, next section). Graduating students reported highest satisfaction with *Professionalism of Instructors* (4.20). The item *Student organization associated with my program* (3.86) received lowest satisfaction ratings in this area for 2021.

**Satisfaction with Campus Services.** Graduates reported varying levels of satisfaction with campus services compared to last year (see tables 4 and 10, next section). Highest satisfaction was reported for the *Covelle Hall Wellness Center* (4.22) and *C-Store at Wilson Commons* (4.22). *Campus Housing* (3.65) was lowest among the campus services.

**Satisfaction with Student Services.** Student Services areas generally showed improvement in satisfaction among graduating students for 2021 (see tables 5 and 11, next section). The highest

satisfaction ratings were reported for *Library Services* (4.32). Lowest ratings were reported for *Student Financial Services* (3.99).

**Extracurricular Activities.** Reported frequency of participation in extracurricular activities declined substantially in 2021 (see tables 6 and 12, next section) for all extracurricular activities listed with *Free Food Events* (2.08) and *Student Life sponsored free activities* (2.12) showing highest participation rates. *Intramural Sports* continues to show the least participation (1.72). Remember, however, that students do not rate these activities or events in terms of satisfaction, merely on self-reported participation. Class schedules, internships, and resident/commuter status likely affect opportunities for participation. For this academic year in particular, the COVID-19 pandemic likely had a drastic effect on participation in group activities.

**General Feedback.** Graduates reported a decline in agreement with all items in this scale from the previous year (see tables 7 and 13, next section). The item “OSUIT helped me achieve my educational goals” showed the highest level of agreement for graduating students (4.07). The item “OSUIT helped me build contacts with industry professionals” remained consistently lowest (3.58).

**Summary Items.** There was a substantial decline in agreement with all three summary items (see tables 8 and 14, next section). Graduating students report their highest level of agreement with the summary item “I would recommend OSUIT to my friends and family” (4.10) followed by “Overall, I am satisfied with my college experience at OSUIT” (4.10) and “I would choose to attend OSUIT again” (4.02). Tables 9-14 (next section) report results over the past five years for comparison as satisfaction and attitudes vary over time. The results for most of the satisfaction and agreement items were quite in line with results from 2016-2018; 2019 results appear uncommonly high when considering the results over the past five-years.

## Graduate Satisfaction

Following are tabled and graphic results for each of the scales. Tables 3-8 (below) show results for the current year (academic year 2020-2021); tables 9-14 (below) present five-years of comparison results for academic years 2016-17 through 2020-21.

## Note on appendices

Appendix A reports placement rates by academic school.

Appendix B reports salary ranges by school.

Appendix C reports comparisons of overall scale averages for each school over the last five years; tables for academic years 2019-2020 and 2020-2021 reflect the academic realignment that took place in summer 2019.

Appendix D reports side-by-side comparisons of school on each scale overall.

Appendices E-I provide the response detail for each scale, broken out by item, for each school.

Appendix J provides a downloaded version of the online survey instrument, including survey flow and display logic, for reference.

Graduation Survey: Online survey download, includes survey flow and display logic

# Graduation Survey (GS)

Congratulations on earning your degree from OSUIT!

***Please read this introduction carefully:***

We need you to complete the Graduation Survey near the end of the semester in which you graduate. If you have graduated before, we ask that you complete this survey again as some of your contact information and opinions may have changed. Your completed Graduation Survey will provide outcomes and placement information to support OSUIT accreditation and accountability; this vital information impacts federal, state, and regional funding of programs that require placement and salary data.

This survey is designed to be completed start-to-finish. Before you start, make sure you have updated information related to your plans for life after graduation, such as new contact information; and, as applicable, information on employment/salary, continuing education, military service, or other plans you have made.

This survey has two parts:

- 1) Demographic/occupational data to be shared with your school/academic department; this data is very important as it affects funding sources that keep educational costs down for all students.
- 2) Satisfaction data; this data will be kept confidential in the Office of Institutional Research. We value your opinions and appreciate your feedback.

Pay attention to your responses on scaled items: **Low** or **negative** responses may be on the **left** or **top**, while **high** or **positive** responses may be on the **right** or **bottom**, depending on your device.

Privacy Statement: Published reports will not include any personally identifiable data. Be careful not to identify yourself when adding comments. Comments will be reviewed by the Office of Academic Affairs after being separated from your personally identifiable data by Institutional Research; these comments will be reviewed as written and may be addressed as deemed appropriate by the V.P. of Academic Affairs. Questions or concerns? Contact Curtis Miller in Institutional Research, email [iar@okstate.edu](mailto:iar@okstate.edu).
